

Thermally powered and inter-operable intelligent VAV diffusers

Semi-custom packaged rooftop units, split systems, & water-cooled packaged units

Pumps, pump packages, booster systems, expansion tanks, air separators, and heat exchangers

Multi-family split systems

Humidification systems

Starters and variable frequency drives

Hose kits & valve packages

Rooftop units and split systems

VRF systems, mini-splits, multi-splits, and building management systems

Vertical packaged units

Plate and frame heat exchangers

Airflow measuring systems, fan array airflow totalizing systems, and pressure sensing devices

CTI certified cooling towers in counterflow and crossflow configurations

Air separators and dirt separators

Modular indoor water-cooled and air-cooled equipment

Modular semi-custom air handling units for chilled water and DX applications

Water-source heat pumps & modular water-cooled chillers

Chilled water fan coil units
