

Semi-custom packaged rooftop units, split systems, air-cooled chillers, and water-source heat pumps

Thermally powered and inter-operable intelligent VAV diffusers

Pumps, pump packages, booster systems, expansion tanks, air separators, and heat exchangers

Air cleaning devices with zero by-product generation

Humidification systems

CO2 and VOC capturing devices

Starters and variable frequency drives

Water and air-cooled modular chillers, packaged chillers, and condensing units

VRF systems, mini-splits, multi-splits, and building management systems

Plate and frame heat exchangers

Airflow measuring systems, fan array airflow totalizing systems, and pressure sensing devices

CTI certified cooling towers in counterflow and crossflow configurations

Air separators and dirt separators

Custom air handling units for chilled water and DX applications
